ABOUT US

Kaiyi Technology is a professional industrial piping solutions provider, specializing in steel pipes, pipe fittings, flanges, and customized products. With strong supply capabilities, strict quality management, and extensive project experience, we deliver reliable solutions for global engineering industries.

COMPANY HISTORY

- 2006** Established in China's Pipe Manufacturing Hub
- 2008** Expansion into Southwest China
- 2011-2016** Expanded nationwide and established itself as a municipal pipeline supplier.
- 2016-2025** Expanded into Belt and Road markets and engaged in environmental and energy projects.

WHY CHOOSE US

A large industrial facility, likely a steel mill or refinery, with multiple large cylindrical storage tanks and complex piping systems. The scene is dimly lit with industrial lighting.

CUSTOM FABRICATION

CUSTOM FABRICATION

KAIYI TECHNOLOGY specializes in custom fabrication of pipeline components based on customer drawings, engineering specifications and project requirements. From technical review and material selection to precision manufacturing and inspection, we deliver reliable customized solutions for industrial piping systems.

ZHUYUAN WASTEWATER TREATMENT SYSTEM

The Shanghai ZhuYuan system is part of the city's critical water and wastewater infrastructure network, integrating large-scale treatment facilities and interlinked pipeline systems.

SHANGHAI

As a pipeline supplier, we provide key materials and system support for municipal and industrial pipeline construction, including:

- Steel / Stainless steel pipelines;Pressure pipeline systems;Corrosion-resistant pipe;solutions;
- Custom fabricated pipeline components;Installation support for complex routing environment.

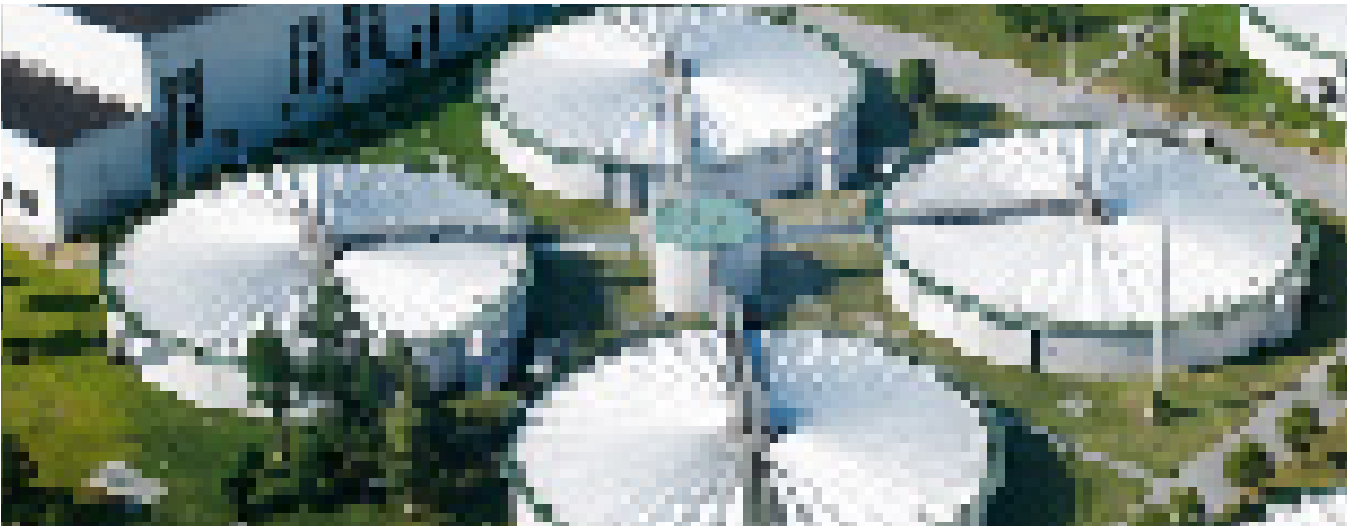

BAILONGGANG WASTEWATER TREATMENT PLANT

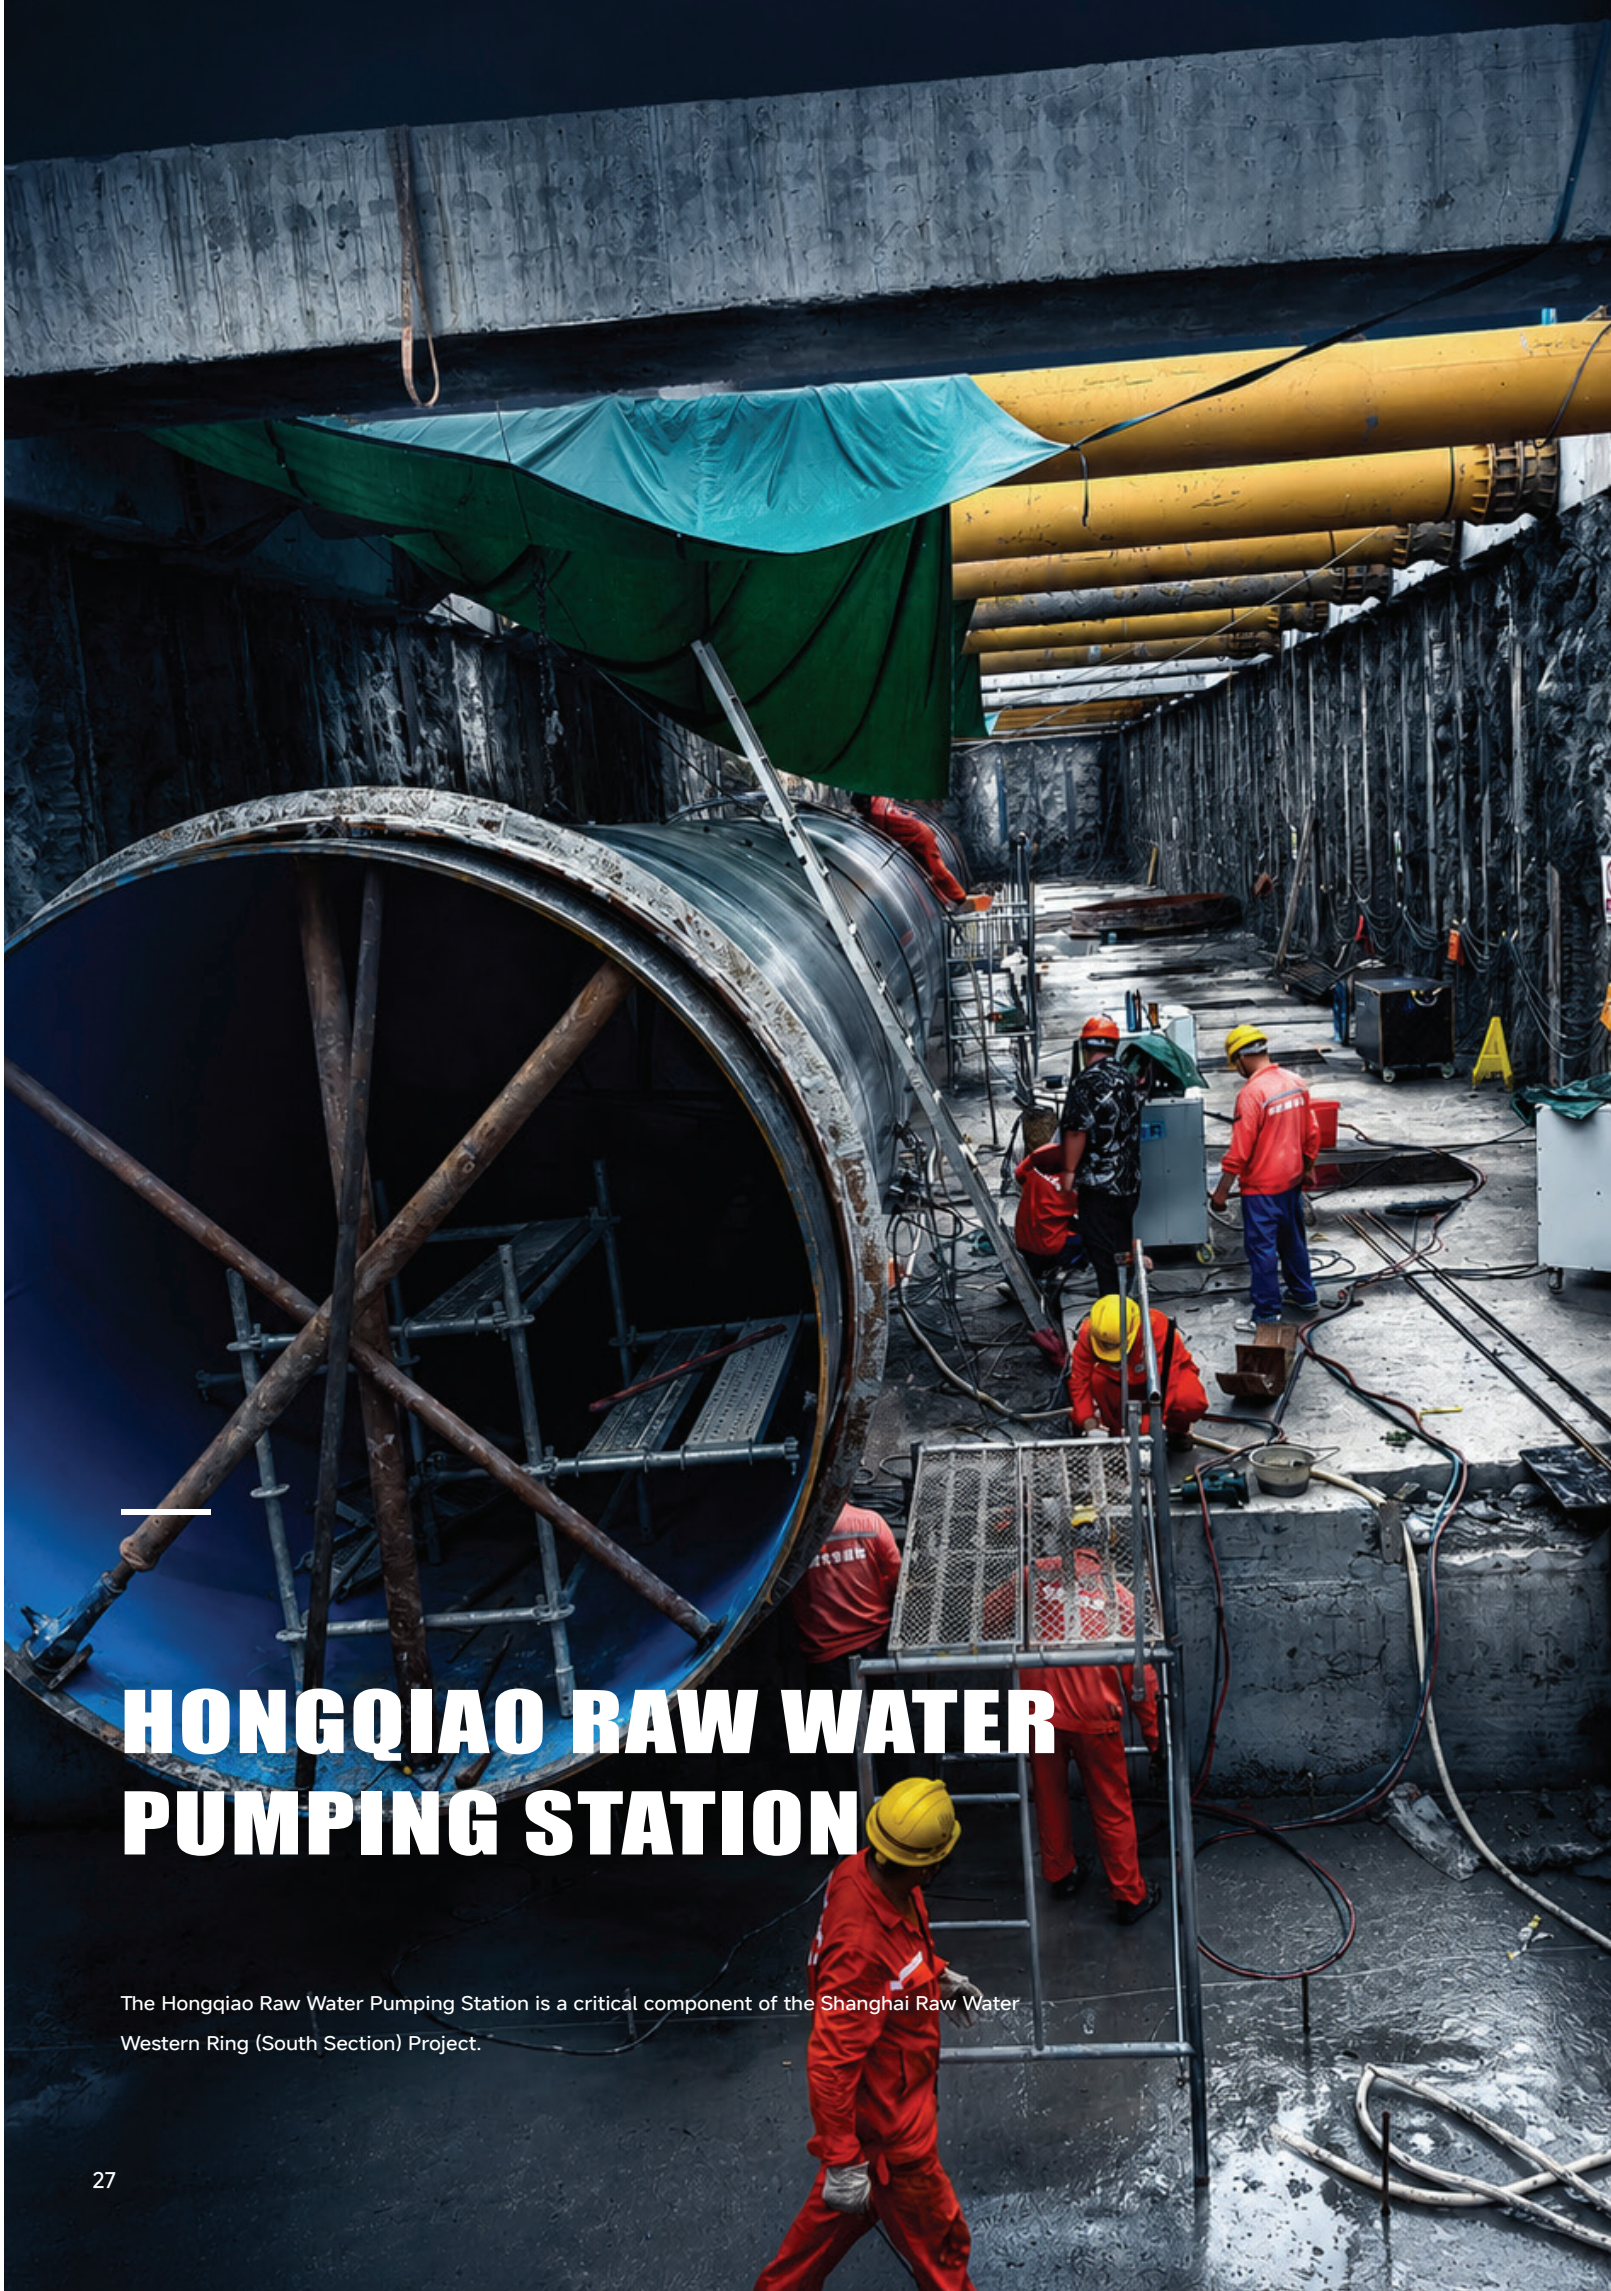

Shanghai Bailonggang Wastewater Treatment Plant is one of the largest municipal wastewater treatment facilities in Asia, located in Pudong New District, Shanghai, China.

SHANGHAI

It acts as the terminal hub for large-scale wastewater conveyance pipelines and regional interception tunnels.

For pipeline and industrial suppliers, the project involves: Large-diameter sewage trunk pipelines; Shield tunneling pipeline sections; Pressure pipelines for pumping stations.

HONGQIAO RAW WATER PUMPING STATION

The Hongqiao Raw Water Pumping Station is a critical component of the Shanghai Raw Water Western Ring (South Section) Project.

SHANGHAI

The Shanghai Raw Water Western Ring (South Section) Project is a key municipal infrastructure project aimed at improving Shanghai's raw water transmission network and strengthening the city's water supply security system.
